Exploring Goalserve's Horse Racing API: Features, Pricing, and Coverage

Introduction to Goalserve's Horse Racing API

Horse racing is one of the most dynamic and data-driven sports, with real-time updates on races, odds, and results being crucial for fans, bettors, and businesses. Goalserve, a well-established sports data provider, offers a Horse Racing API that delivers extensive data feeds covering major racing tracks worldwide. This API provides access to essential information, including race entries, results, historical data, and bookmaker odds.

In this article, we will explore Goalserve's Horse Racing API, including its features, pricing, and coverage, and how it benefits users in different industries.

Key Features of Goalserve's Horse Racing API

Goalserve's Horse Racing Data Feed API is designed to serve betting platforms, fantasy sports applications, sports analytics services, and race enthusiasts. Here are some of the notable features:

1. Comprehensive Horse Racing Data

The API provides real-time updates and detailed insights, including:

- Race Entries and Results – Track upcoming races and see live and past race results.
- Odds Comparison – Access bookmaker odds for daily and antepost racing.
- Historical Data – Get access to race history spanning over 10 years.
- Horse Form Tracker – Analyze a horse's past performances to make informed decisions.

2. Global Coverage

Goalserve covers horse racing events across multiple countries, including:

- United States (USA)
- United Kingdom (UK)
- Australia
- South Africa
- Sweden
- France

Additionally, they offer specialized coverage for major racing events like:

- Cheltenham Festival

- Kentucky Derby
- Antepost Racing

3. API Formats: XML & JSON

The data feeds are available in XML and JSON formats, making integration seamless for developers and businesses. These formats ensure that the data can be easily utilized across different platforms, including mobile apps, websites, and betting systems.

4. Real-Time & In-Play Data

For users involved in live betting and analytics, Goalserve provides in-play live odds data. This feature ensures that you have the latest odds and race statistics at your fingertips.

5. High Uptime & Reliability

With a 99% uptime guarantee, users can rely on Goalserve's API for continuous access to crucial horse racing data. Their 24/7 support further enhances the reliability of the service.

Pricing Plans for Goalserve's Horse Racing API

Goalserve offers flexible pricing plans based on subscription duration. Here is a breakdown of the available packages:

Plan	1 Month	6 Months	12 Months
Horse Racing Package	$200	$900	$1500
Full Package (All Sports)	$800	$3550	$5100 (Discounted to $4000)

What's Included in the Horse Racing Package?

- Bookmaker Odds for different betting markets.
- Historical Data for up to 10 years.

Full Package (All Sports)

For businesses requiring multiple sports data feeds, Goalserve offers a Full Package that includes:

- All available sports data feeds (Football, Basketball, Tennis, Cricket, Esports, etc.).
- In-Play Live Odds API for real-time betting.
- Live Match Tracker & Ball Position API for enhanced sports analytics.

Who Can Benefit from Goalserve's Horse Racing API?

Goalserve's Horse Racing API is ideal for various industries and applications, including:

1. Sports Betting Platforms

Betting sites can integrate real-time odds and results to provide users with up-to-date betting opportunities.

2. Fantasy Sports & Gaming Apps

Developers can use horse racing data to build fantasy racing games and other interactive applications.

3. Media & News Websites

Sports journalism platforms can access accurate horse racing stats and updates to enhance coverage.

4. Data & Analytics Companies

Horse racing analysts and data scientists can use historical results and form trackers to identify betting trends.

Why Choose Goalserve for Horse Racing Data?

☑ Reliable & Accurate Data

Goalserve has been in the market for 15+ years, providing accurate and timely sports data.

☑ Wide Coverage & Historical Data

Their API covers major international racing tracks and offers over 10 years of historical data.

☑ Flexible Pricing & Subscription Plans

With various pricing tiers, Goalserve ensures that businesses of all sizes can access valuable data.

☑ 24/7 Support & 99% Uptime

Their 24/7 customer support and high uptime guarantee make them a trusted provider in the industry.

Final Thoughts

Goalserve's Horse Racing API is a powerful tool for anyone looking to access real-time racing data, bookmaker odds, and historical performance statistics. With global coverage, easy integration formats (XML/JSON), and reliable uptime, it's an excellent choice for businesses and enthusiasts alike.

Whether you are building a betting platform, a fantasy sports app, or an analytics service, Goalserve offers customized solutions to help you stay ahead in the world of horse racing.
